

# Pre-Compression Trigger Sprayer

## Features & Benefits

High quality longevity trigger  
Minimal 10,000 strokes makes the OpUs suitable for re-fill and re-use applications. Trigger to last for a minimum of 27 bottles of 500ml.

Pre-compression trigger  
Once primed, no need for re-priming. Controlled system pressure and constant spray performance.

All plastic trigger  
The complete trigger is made from Polyolefins which makes the OpUs light weight. (excl. Up-Side-Down version)

Options  
Up-side-down (left), EDGE (middle), 3-finger trigger (right), Child resistant

Refill cap  
A refill cap as closure for a refill bottle with Snap On neck (non-CR). Made from PP, ± 2.1 gram and available in white color

Trigger Lock  
Optional is the trigger lock which fixates the trigger during transportation and makes the trigger E-commerce compatible. Made from PP, weighing 0.6 gram and available in red, blue and transparent color.

## Specification

### Output

1.35cc (standard)  
1.2cc

### Nozzles

12 different spray/foam options (see backside)

### Material

All plastic, Polyolefins (PP, PE)  
(excl. Up-Side-Down version)

### Weight

Between 24.4 and 26.3 gram depending on the configuration.

### Closure

Screw Cap &  
Snap On

### Dip tube

Straight, curved or nicked  
Length: min. 140mm, max. 310mm

### Colors
